

## ① Welcome / Loading Screen

- People / Person playing w/ cats + dogs
- Start w/ a drawing - Tasha
- Product Name?

(1) Pet Foster  
(2) PetFirst  
(3) PetMatch  
(4) PTAPE (for The Pets)  
Something w/ Paws?  
shelters  
? → Pets Insight

## ② Log in Screen

- Animal Shelters
  - \* Must register their shelter
  - \* Have them register a code that's shared among volunteers of that shelter
- Looking to Adopt
  - \* Don't have to create account

Can we save this initial choice so they can skip after? But have the choice to "log off" in settings

## ③ User Set Up Page

- allow guest to set up an account to register preferences
- lets them get notified when their preferences are found
- lets them add pets to their "favorites"
- gets notified when someone added pics/info to that pet

## ④ User Log In Page

- Log in (gmail, facebook)
- Continue as guest

## ⑤ User Main Screen

- \* Highly resembles Yelp \*
- \* Map shows the shelters / common adoption event locations (think SPCA + PetSmart)

→ Filter by:

- breed
- distance
- age range
- gender
- color?

→ Button for Tinder Mode.  
just swipes thru all dogs,  
with filters still applied

→ "How Can I Help?" button ← maybe call it something else

→ Options:

1. Visit Shelters and upload info on animals (and get points!!)  
\* might need a method to verify info is accurate?  
↳ info first gets sent to shelter account for approval
2. Provide locations that take volunteers
  - when they click on loc, they're directed to volunteer info provided by who shelter signed up (w/ link button)
  - List view + Map view options
    - list view already starts to present description
3. Donate!
  - offers selection buttons of things the user could donate.

## TO FIGURE OUT

\$\$ ← not a big concern, but I know I don't want ads

sponsors?

→ PETA

→ SPCA

→ Private Equity, Venture Capital (?)

→ AppDev community on Reddit

## ③ Animal Shelter Set up Screen (not Log-in)

- ① Search their name
    - keep expanding the list as more shelters register
  - ② If existing, ask for access code. (see screen 2)  
(so pretty much doesn't need to set up if 1:1 match)
  - ③ If not existing, enter details like address, hours, volunteers allowed?, animals available,
    - ↳ offer the ability to register info of pets that are there
      - \* Age
      - \* Gender
      - \* Estimated breed
      - \* How long they've been there
      - \* Pictures
      - \* Backstory?
      - \* Personality Traits / Medical stuff
- \* Make it clear they can do this later
- ④ Do you take volunteers?
    - provide contact #/email → or this be within the app!!!
    - Description of what needs to be done  
Ex: Attend an orientation set on specific dates
  - ⑤ How can we help you?
    - allow the shelter to list items they need  
i.e. food, beds, blankets, cleaning products..

Individual fosters  
can do this too

\* include a foster button  
(yet another experience?)

## ④ Animal shelter Log In Page

- just the access code
- maybe name too? idk if needed

## ⑩ Animal Shelter Main Screen

- Edit basic info
- Add animal info
- Review / Approve user pics / comments  
(Helps verify they're talking about the right dog/cat)
- consider letting volunteers apply on the app

→ list view already starts to present description

### 3. Donate!

- offers selection buttons of things the user could donate.
- Based on their selection, show which shelter needs those items
- \* Implement a way to see if one place is getting way less than another

→ Maybe also a venmo option?

## ⑧ Tinder Screen

- Main pic tile is pics of dogs  
(limit # of pics?)
  - Maybe show most recent 17 pics, but if user swipes up to see more info, they can access all pics

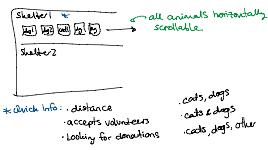

→ Main tile also shows distance, age, breed, gender, fostered?

- Swipe Up
  - scroll thru comments other users have submitted about that animal

- if fostered, request foster info
- \* fosters can register w/ an organization, and choose to set a profile for their foster(s)

## ⑦.1 List View (Main Screen)

→ Separate by shelter

\* Quick info: distance, accepts volunteers, looking for donations

, cats, dogs  
, catz, dogz  
, catz, dogz, other

+ After clicking on the dog image, see all pics in gallery

\* comments from volunteers (similar to Yelp)

+ Basic Info (see page 3)

## ⑨ Specific Shelter Tile

- List or Grid view of animals (w/ names + age on tile) (not breed)

→ Hours,

- Takes Volunteers (info below)
- Needs Donations (start listing items, see all button)

→ Address

- \* Should users be able to comment on the shelter too? clean, friendly, etc.? Necessary?

→ Users will be able to add info to any dog/cat

+ input any missing dog/cat

→ pics + comments (like Yelp)

→ Add comment Add concern <sup>⑩</sup>

\* Concern info:

- comment sent directly to animal shelter (not seen on comments section)  
i.e. diarrhea, limping, cut, bite, etc.
